

# Nous recherchons

- Team Leader
- Finance Professional
- Programmatic / M&E Expert
- Procurement and Supply Management (PSM) Expert for Health Products

Côte d'Ivoire - Benin

# Team Leader

## ➤ Key Responsibilities:

- Lead and manage the team to deliver high-quality oversight and reporting for Global Fund grants.
- Oversee the design, management, monitoring, and evaluation of public health programmes.
- Ensure effective engagement with stakeholders, donors, and international development agencies.
- Coordinate multiple complex projects to achieve program objectives and timelines.

## ➤ Candidate Profile:

- Master's degree (or equivalent) in Business Administration, Public Administration, Accounting, Finance, Economics, Public Health, Social Sciences, or a related field.
- Membership in a recognized professional body (e.g., ACCA, CPA, etc.).
- Extensive experience in the design, management, monitoring, and evaluation of public health programmes, particularly in HIV/AIDS, TB, and/or Malaria.
- Minimum of 10 years' experience working with donors and international development agencies, including substantial experience in West Africa.
- Prior experience with the Global Fund and other major development programmes in multiple countries is highly desirable.
- Proven track record in managing complex, multi-project environments to deliver results on time and within scope.
- Exceptional interpersonal, diplomatic, and communication skills, with the ability to engage senior officials and professionals from diverse backgrounds.
- Excellent verbal and written proficiency in both English and French.

# Finance Professional

## ➤ Key Responsibilities:

- Conduct thorough reviews and analyses of accounting transactions to ensure accuracy, compliance, and transparency in financial reporting.
- Assess, negotiate, and provide recommendations on budgets submitted by grant recipients, ensuring alignment with program objectives and donor requirements.
- Evaluate financial management systems, including internal controls, processes, and procedures; identify areas for enhancement and provide actionable recommendations for improvement.
- Review and analyze financial statements, including income and expenditure reports, balance sheets, and cash reconciliation statements, to ensure reliability and integrity of financial information.
- Examine and interpret audit reports, identifying significant findings and providing guidance on addressing areas of concern and implementing corrective actions.

## ➤ Candidate Profile:

- Master's degree (or equivalent) in Business Administration, Public Administration, Accounting, Finance, Economics, Public Health, Social Sciences, or a related field.
- Membership in a internationally recognized professional finance or accounting qualification (e.g., ACCA, CPA, CIMA, CMA, ordre des Experts-Comptables etc.).
- Minimum of 8 years' experience working in a financial role with donors and international development agencies, including substantial experience in West Africa.
- Prior experience with the Global Fund and other major development programmes in multiple countries is highly desirable.
- Proven track record in managing finance operations in complex, multi-project environments to deliver results on time and within scope.
- Exceptional interpersonal, diplomatic, and communication skills, with the ability to engage senior officials and professionals from diverse backgrounds.
- Excellent verbal and written proficiency in both English and French.

# Programmatic / M&E Expert

## ➤ Key Responsibilities:

- Provide technical expertise in planning, management, and monitoring & evaluation (M&E) of public health programs, ensuring alignment with best practices and donor requirements.
- Proactively identify risks related to programmatic implementation and propose practical, effective solutions.
- Identify opportunities to strengthen M&E systems and enhance program quality, including initiatives to improve health service delivery, clinical and programmatic practices, patient outcomes, and overall health system performance.
- Promote and support the integration of sustainability and continuous quality improvement principles into grant design and implementation processes.
- Review and analyze data from diverse sources such as routine health information systems, program reviews, evaluations, health facility assessments, surveys, and special studies to inform decision-making and drive program improvement.

## ➤ Candidate Profile:

- Master's degree (or equivalent) in Medicine, Public Health, Epidemiology or a related field.
- Minimum of 9 years' experience working as an M&E expert with donors and international development agencies, including substantial experience in West Africa.
- Strong understanding of public health monitoring and evaluation systems, particularly in HIV/AIDS, Tuberculosis, and/or Malaria.
- Prior experience with the Global Fund and other major development programmes in multiple countries is highly desirable.
- Exceptional interpersonal, diplomatic, and communication skills, with the ability to engage senior officials and professionals from diverse backgrounds.
- Excellent verbal and written proficiency in both English and French.

# Procurement and Supply Management (PSM) Expert for Health Products

## ➤ Key Responsibilities:

- Conduct analytical reviews and spot checks across all stages of the health product life cycle, including product selection, quantification and forecasting, procurement, supply planning, warehousing, distribution (including last mile), rational use, regulation and quality assurance, and waste management.
- Evaluate health system operations and legal frameworks governing the pharmaceutical and laboratory sectors, including regulatory compliance, operational frameworks for medical stores, and the flow of health products and funds.
- Assess and interpret complex procurement and supply chain management models for health products, including demand forecasting and supply delivery mechanisms.
- Proactively identify procurement and supply chain risks, and provide effective, practical solutions to address them.
- Ensure adherence to best practices in procurement, distribution, and quality assurance of health products, contributing to the overall efficiency and integrity of the health supply chain.

## ➤ Candidate Profile:

- Master's degree (or equivalent) in Pharmacy, Public Health, Medicine or a related field.
- Professional training in procurement and supply management (PSM) of health products, logistics and/or public health.
- Minimum of 9 years' experience working as a PSM expert of health products with donors and international development agencies, including experience in West Africa.
- Experience/expertise in assessing policies, systems and structures in the public and/or private health sector as well as the procurement of health products including regulations and tendering process.
- A good understanding of HIV/AIDS, Tuberculosis, and/or Malaria market dynamics and existing global supply challenges as well as international health products procurement and supply management practices, applicable national and international laws and recognised standards.
- Prior experience with the Global Fund and other major development programmes in multiple countries is highly desirable.
- Exceptional interpersonal, diplomatic, and communication skills, with the ability to engage senior officials and professionals from diverse backgrounds.
- Excellent verbal and written proficiency in both English and French.

# Application Instructions
